Appears in Collections: [Ohio State Engineer: Volume 21, no. 7 \(June, 1938\)](#)

GRADUATING CHEMICAL ENGINEERS

A LAS, alack! The time is rolling around when another group of aspiring, hopeful, ambitious chemical engineers are about to go forth to make the world a smellier place in which to live. They have all passed most of their courses and are now ready to accept one of the many, many offers of good paying jobs which beset them. But before these three dozen seniors become big shots, it is fitting that we record for posterity the sterling qualities which they possess today.

First on our list (alphabetically) is **GERALD BENSON**, product of that great metropolis, Lodi (It's in Ohio—somewhere). This able mercaptan mixer has the cleanest apparatus of the entire class—rumor has it that he gets practice doing dishes for the wife. We'll bet she helps with the homework, too?

NORMAN CAMMERER, who may be found at the Phi Gam shack when not visiting relatives (?) in Dayton, spent the first year of college life at Dayton U. Finding Ohio State superior in multifarious misses, he has never regretted the change.

CARL CASTO, who lives right here in Columbus, would like to know if a girl by the name of Georgia from Alabama can be really consistent. We wonder if the young lady knows that Casto didn't spend all of his evenings on the inspection trip writing post cards to her.

ROBERT "Sneezy" CONAWAY, Columbus, has combined a very likeable hobby with his thesis work. One of our sporadic snoopers reports that the cider which Mr. Conaway is freezing with solid CO₂

has been decreasing at a rate much greater than calculations would have us believe.

MAYNARD "Arrow" COLLIER (yes, a very poor pun) is from Bowling Green, where he spent a year at the university there. Mr. Collier is a member of Tau Beta Pi, and claims that Physical Chemistry should be made into a five-hour course. Most of the boys will agree with him we're quite sure.

FRANK CSERVENYAK, Barberton buccaneer, claims that the Chemical Engineering course leaves too much time for outside enjoyment. To quote Frank, "If I had an opportunity to take more hours, then I would have a better excuse to keep adoring females from haunting my door."

PAUL CUNNINGHAM, known as far west as Wapakoneta as the "Romeo from Lima," denies that this rumor has any real basis. "My only aim in life," he said, "is to become as happy as the world famous production engineer who was on the I. E. float Engineer's Day."

DANA "Bashful" DAVIS is from Gallipolis, Ohio. Although inclined toward the life of a sailor, Dana likes sailing only as a hobby. Mr. Davis claims that the courses which he liked best in school were Chemical Engineering 691, 692, 694, 701, 706, 731, 702, 720, and 721.

HOWARD "Where Can I Get a Speed Reducer" EVANS emerged from the fog which perpetually surrounds the city of Youngstown to come to State; although some naughty boys say that he acts as though he still were in it. Howard is a member of Phi Kappa Psi.

LOUIS GUENTERT, Toledo torpedo, takes life as he finds it. When questioned about his favorite professor, he replied, "Favorite? I have none—you, see, I like them all." His pet hobby is collecting pipes—not stovepipes, gas pipes, blowpipes, or bagpipes—but the smoking variety.

VICTOR "Our Boy Vic" HARRIS claims to have the heaviest beard in the department. But aside from that, his next most interesting hobbies are managing the softball team and investigating the various night spots—purely from an investigatory standpoint, of course. Vic comes from Cleveland.

CHARLES "Call Me Henry" HISER calls Springfield home, and is a member of Beta Theta Pi and Pi Tau Pi Sigma. After watching this human monkey play with his thesis work way up near the ceiling, we wonder if he is planning next to do graduate work on the A. I. U. glorified smokestack.

JOHN KSEPKO, Cleveland boy, spends his time in Columbus at the Circle T ranch (Theta Tau). Having been refused W. P. A. labor to help him finish building his thesis equipment, John has decided to finish it himself. We hope he finishes by graduation time.

FRED "Doc" LEVY, candid camera cut-up, pilfers perfidious pictures portraying people pondering

perplexedly over pertinacious problems. A member of Tau Beta Pi, Fred's home is in Fremont.

WILLIS LOVE, New Athens, is still true to the hometown girl, according to Willis Love. He is a Tau Beta Pi member, and—hometown papers please copy—he has a job. Don't look so green, you other guys, your time will come (you hope).

RICHARD McCORMICK, Columbus chemical, is our little sunbeam. Whenever things get dull in thesis conference, Dick is on hand to remedy the situation. However, this lad will bear watching—he falls asleep in the darndest places. (Remember Washington, D. C., last year?)

KEATOR McCUBBIN hails from Lewisburg, that big little city south of—uhh—well, it's south. We wonder if Mac's chemical engine ring training will aid him in producing a new by-product. Maybe a catalyst would help.

JOHN "Paid Your Dues?" McKINNEY is, besides treasuring A. I. Ch. E., a member of Sigma Phi Epsilon and Scabbard and Blade. John is from Doylestown, and when asked if he were glad to be through school, merely dropped a tear and replied, "Uh-huh."

ADOLPH "Grumpy" MILLER is a quiet boy from Cleveland. Planning to enter the rubber business upon graduation (Firestone), Mr. Miller's statement reads, "Unless I'm stretching things a bit, I think the rubber market is too inelastic."

DANIEL "Dopey" MILLER, Baltimore-ite and member of Tau Beta Pi, claims that he really learned things on the inspection trip this year—seems like we saw him going into a burlesque show in Detroit. But we imagine things have been rather quiet since Danny mysteriously—for no reason at all—got rid of his motorcycle.

FRED NEUHART, from Zanesville, is planning to corner the beryl market after he finds a method of reducing beryl. Fred claims that the process can be found, in fact he might even get credit for his thesis which he is writing on this subject.

ALEXANDER "Alex" NEWHOUSE is another Columbus lad. His hobbies are football and boxing, and also beating the civils single-handed in baseball. Coming from a long line of engineers (two brothers before him were suckers to take engineering) his hopes for the future were exemplified in his position as sales engineer in the A. I. Ch. E. float.

WAYNE "Happy" OBERLIN is one of the boys who doesn't believe in Monday classes. However, he was the hero of the inspection trip in Cincinnati when he was the only one who could entice a certain unapprehended criminal into the clutches of the law. He must have some supernatural powers!

PRENTICE "P. W." REEVES, Columbus, is a member of Scabbard and Blade, Kappa Sigma, and Tau Beta Pi. Of the "Four Ways to Go Through Col-

lege," Mr. Reeves will not admit having used the first method. "My nose looks normal, doesn't it?" he quoted when asked, but made no comment as to the other three methods.

ROBERT "I also live in Columbus" SAVAGE is the retiring president of the A. I. Ch. E., and is also a member of Texnikoi, Engineers' Council, and Ohio State Engineer staff (business manager). We wonder what Bob does with his spare time.

BURTON WOLF (not Wolfe) is another Colum-

busite. A member of Tau Beta Pi, Mr. Wolfe (pardon, Wolf) was asked what his nickname was. "Some of the boys calle me 'Burpin,' but don't print that, will you?" Very well, Mr. Wolf.

GAYLORD (Thank goodness he's the last one—we're running out of material) WOODWARD comes from a town by the name of Stryker. If we thought real hard, we might think of a pun on the name of this town; but since you have been kind enough to read this far, we will spare you the agony.
